Width: 1 250 mm (49 1/5 in)

Depth: 1 150 mm (45 3/10 in)

### Bale Weight

Household Waste: 950 - 1 300 kg  
( 2,100 - 2,900 lbs)

### Capacity

Waste Amount per Hour: 12 000 - 25 000 kg /h  
(26,000 — 55,000 lbs /h)

### Baler Dimensions

Baler Length: 6 000 mm (240.0 in)

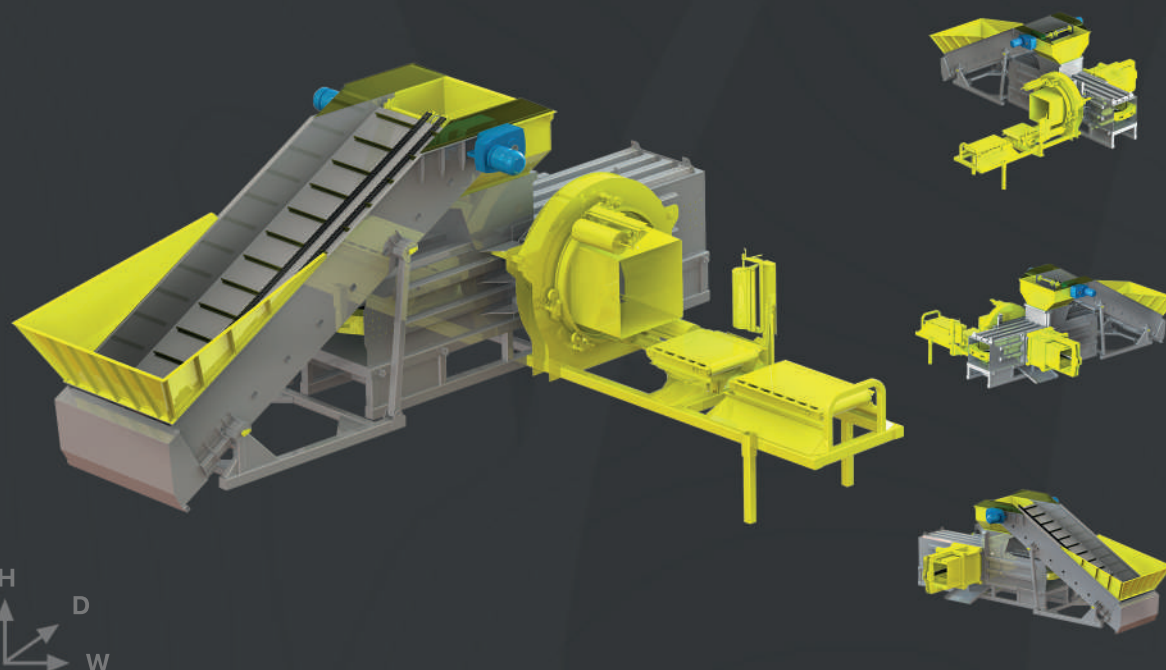

Feeder Length: 6 000 mm (240.0 in)

Total Length: 10 500 mm (413.0 in)

Total Width: 5 600 mm (220.0 in)

### Paalaimen paino

Total Weight without Chassis: 14 000 kg  
(31,000 lbs)

### Additional notes:

- The shape and weight of the finished bale are optimized for road transport and long-term storage.
- The baler is easy to move from one location to another, and work can be continued at another site with short notice.
- There is no similar product on the market that offers the same features as the waste baler.
- The fully automated machine creates a rectangular-shaped bale wrapped in plastic entirely independently.
- Changes to document information without prior notice are reserved.
